n=No. of responses
av.=Mean
dev.=Std. Dev.
ab.=Abstention

1. TA EVALUATION

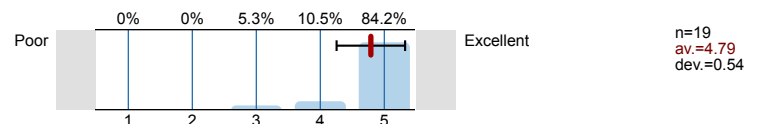

1.1) What is the overall rating of the Teaching Assistant?

1.2) The teaching assistant's ability to answer student's questions.

1.3) The teaching assistant's ability to explain material and assist with any other aspects of the course and/or lab.

2. OPEN ENDED QUESTIONS

2.1) Please comment on specific characteristics of the teaching assistant that were most beneficial to you:

- I would have been lost without Reem's review sessions and feedback to Blackboard posts during this course. I was so happy that Reem explained complex material to the students in a way that all could understand given the diverse math skill levels in the class. Reem went above and beyond her time during the review sessions that were scheduled for one hour, but Reem often went over 2.5 hours for the sessions to ensure students understood course materials and answered all questions pertaining to the course. Thank you Reem for a challenging but positive semester. We appreciate all of your efforts!!!
- Reem did a great job at explaining the material and clarifying our questions to help us understand the concepts. She is also very patient, accommodating and great at following up with questions. I appreciated her making time to go over any concepts that were not understood or willing to go over some of the homework questions.
- Reem had quick and easy solutions to all complicated problems. They really helped me ace my quizzes. TA reviews are usually one hour and Reem has gone over and above the stipulated time in answering questions. We've had even 2.5 hour sessions and she's been patient all the time.
- Reem is extremely smart and very helpful. She made sure we truly understood the information she was trying to relay and she stayed over until all questions were answered. She was very accommodating to the requests of the students.
- Reem was great in helping me and other students understand the material, she was patient, kind and took her time. Numerous times she stayed online with students way past the review session scheduled time in order for us to understand the material. She relayed our concerns to the instructor and.
- Reem was responsive to questions in a timely manner.
- Reem was very knowledgeable and had much more challenging content to cover than the professor.
- Reem worked hard to make the examples clearly laid out for the students and helped us with our gaps in content knowledge in regards to

solving mathematical equations. She was always very attentive to her emails and the discussion board on blackboard.

- Reem's absolute knowledge of the material and willingness to explain it in different ways helped me tremendously in this course. Her personality is conducive to helping students succeed and created an optimal learning environment where all questions were answered. The review sessions with Reem were a perfect complement to the class material being taught. Any time I had a question, she was promptly responding to emails offering solutions.
Thank you Reem, I truly appreciate your help!
- She was always willing to help and tried her best to explain in different ways so that everyone understood.
- available for questions and review sessions
- never met w them

^{2.2)} Please provide constructive comments on specific aspects of the teaching assistant that need improvement.

- All is well.
- During our review sessions some of the equations were hard to follow when they were typed out due to the lack of subscripts and superscripts within the equation.
- None
- Review sessions were too long and certain students would talk way too much which was frustrating - I would have rather completed the review questions in 45-60 minutes then student comments and questions could be handled separately.
- She was very good.
- Sometimes the quality of sound and video was low on Zoom, but she tried throughout the semester to make it better.
- The TA is very knowledgeable and patients. I think she will be great in in-person class setting. The TA was not well equipped to lead the virtual sessions.
The class was very slow paced as she went through the examples while typing the works on word doc.
- The only constructive comment is to be a bit more authoritative when student's interrupt or attempt to teach the class. I know that's the reason many students stopped coming to the class because of one particular student who interrupted consistently; and will only confuse the class.
- n/a
- sometimes the technology barrier. but overall good
